

NS7MAP

MIGRATION ACTION PLAN

ASK US HOW TO GET THERE!

CONSIDERING MIGRATING TO NS7?

IF SO, YOU WILL NEED AN ITS NS7 MIGRATION ACTION PLAN. (NS7MAP)

ITS has developed a 1 week engagement designed to help you plan for any unexpected costs, minimize the potential of a false start or failed migration, and streamline the process, saving you time & money. The **ITS NS7MAP** will:

- 7** Document your current Altiris infrastructure
 - Inventory hardware, solutions and custom reports

Where are you now?

- 7** Gap analysis between your current Altiris environment and one required by NS7
 - Provide a list of prerequisites
 - Missing roles like site and task server
 - Servers not up to specifications such as operating system and hardware

What is missing?

- 7** Develop a customized Migration Action Plan (MAP) document
 - List action items
 - Prioritize by required vs. nice to have

How to get there?
